DETAILED ACTION***Response to Amendment***

On 25 August 2008, applicant Amended claims 1, 6-7, 9, 11-12, 18, 24 and 37-39. Applicant also added claim 40 and cancelled claim 10.

Claims 1, 18 37 are independent. Claims 1 and 37 are directed to methods, claim 18 is directed to a computer readable memory.

Claims 1-9 and 11-40 are pending and are allowed.

Examiner's Reasons for Allowance

The following is an examiner's statement of reasons for allowance:

Applicant's amendments are commensurate with the disclosures.

Preferred social interaction type is interpreted as on page 14, lines 9-10 of the specification. For claim 18, computer readable memory is interpreted as hardware that stores the user profile database and the various modules.

The closest prior art is Henson, US 6,167,383. However, Henson does not disclose the combination of features of representative claim 1, inter alia,

(a) obtaining an identification of a user and a preliminary designation of said product; said identification identifying a user profile that is uniquely associated with said user, the user profile being persistent across multiple optimization sessions and comprising a plurality of characteristics of said user, said plurality of characteristics comprising:

- (1) a preferred social interaction type;
 - (2) a plurality of domain familiarity indications, each of said domain familiarity indications reflecting said user's knowledge about a specific product domain; and
 - (3) a price sensitivity for said user;
- (b) providing a formatted display...:
- (1) the preferred social interaction type;
 - (2) the plurality of domain familiarity indications; and
 - (3) the price sensitivity for said user;

Updated searches were performed and none of the prior art of record remedies the deficiencies found in Henson. Furthermore, neither the prior art, the nature of the problem, nor knowledge of a person having ordinary skill in the art, provide any reasonable rationale to combine prior art teachings.

The closest non-patent literature is Bates, Allyson, Apple's next-generation systems, MacWorld, San Francisco, January 1998, vol. 15, issue 1, p. 68, 8 pages, downloaded from ProQuestDirect on the Internet on 09/27/2008.

Bates does not disclose the combination of features, *inter alia*,

- (a) obtaining an identification of a user and a preliminary designation of said product; said identification identifying a user profile that is uniquely associated with said user, the user profile being persistent across multiple optimization sessions and comprising a plurality of characteristics of said user, said plurality of characteristics comprising:
 - (1) a preferred social interaction type;
 - (2) a plurality of domain familiarity indications, each of said domain familiarity indications reflecting said user's knowledge about a specific product domain; and
 - (3) a price sensitivity for said user;
- (b) providing a formatted display...:
 - (1) the preferred social interaction type;
 - (2) the plurality of domain familiarity indications; and
 - (3) the price sensitivity for said user;

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to JAMES ZURITA whose telephone number is (571)272-6766. The examiner can normally be reached on 8am-5pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jeffrey A. Smith can be reached on (571)272-6763. The
